Exigence™ One Patch

for Pain Control

FOR IN-OFFICE ADMINISTRATION

Exigence™ One Patch for Office Administration, is the complete formula for long-lasting pain relief formulated specifically for in office application by the provider. Excellent for pre or post joint manipulation, post procedures, adjustments, and patient complaints of mild aches and pains associated with arthritis, tendonitis, chronic pain and workplace injuries.

Ask any one of the one hundred million American pain patients to describe the experience of living with pain in just one word. The top answer? Ordeal.

Because it's not just the pain symptoms that lead to anxiety, irritability, and worsening quality of life. It's the work required just to manage those symptoms. Pills must be taken at the right times and food and drink must be avoided with various medications. There are endless visits to physicians and pharmacies – all ending with the same over-prescribed ineffective painkillers with maddening side effects and other issues.

That's why smart physicians introduced Exigence™ One Patch for In-office Administration for effective pain relief. Its greatest strength is simplicity. Exigence™ is tough on pain – and nothing else. Exigence™ is formulated with anesthetic and analgesic compounds that help stop pain signals in their tracks.

Exigence™ is delivered directly to the skin enabling the patient to target troubled areas. And best of all, Exigence™ is active only in the applied treated pain regions – without any numbness in nearby joints or extremities – so you can return to your daily life or work routine reassured that untreated areas may not bring unwanted surprises.

Pain is complicated. Relief should be simple. Get immediate relief of pain symptoms with the only formulation designed to put the patient in charge: Exigence™.

Effective Pain Relief

Physicians recommend the One patch Administered in-office, Exigence™ for pre-post procedures, adjustments, joint and muscle therapy, as an over-the-counter management of most localized pain symptoms. Topical pain relievers are less invasive, not dependent on ingestion, and less prone to contraindications. The simplicity of targeted pain relief from the outside-in makes Exigence™ an unbeatable hero in the fight against enduring pain.

Formulated to Exceed Standards of Safety

Exigence™ is designed to administer the most dependable topical pain-relieving agents available over the counter. While other pain medications are often products with sub therapeutic ingredients and exaggerated claims, Exigence™ is manufactured in a licensed, FDA-registered facility subject to cGMP (Current Good Manufacturing Procedures) and standards of compliance and safety. All ingredients are FDA-approved and have been used safely for decades.
